

Christopher Robin Fiore

Product Designer

Open to roles in New York or remote

New York, NY + chrisrobinfiore@gmail.com + christopherfiore.net + [linkedin.com/in/christopherrobinfiore](https://www.linkedin.com/in/christopherrobinfiore) + github.com/globalanomalyindex

Product Designer working across interaction design, AI-native products, accessibility, design systems, and functional prototyping. I turn ambiguous product problems into interaction architecture, build the difficult behavior as working prototypes in React, Next.js, and TypeScript, then test whether the idea holds up through experiments, simulation, and accessibility audits. **10** live prototypes and shipped tools, **2** published open-source plugins, and in-depth case studies.

CORE SKILLS

Product Design	Product strategy, UX/UI, interaction design, information architecture, user flows, wireframing, prototyping, design systems, state design, responsive design, motion, accessibility (WCAG)
Design Engineering	React, Next.js, TypeScript, JavaScript, Vite, Tailwind CSS, Motion, XState, Three.js
Research and QA	Experiment design, preregistration, simulation, comparative evaluation, research synthesis, Vitest, Playwright, axe-core, GitHub Actions
Tools and AI	Figma, Claude Design, Adobe Photoshop, Claude Code, Codex, plugin architecture, agentic workflow direction, AI-assisted prototyping, AI-native interaction design

EXPERIENCE

Independent Product Designer 2025 to Present

Independent product design and design engineering practice. New York, NY

- + Problem framing, user flows, state models, component systems, high-fidelity UI, functional prototypes, and evaluation criteria, start to finish. Direct AI-assisted development while owning strategy, interaction decisions, and execution.
- + **Chellbook** *prospective-client concept* Product built around the real needs of a prospective client living with celiac disease. Developed **46** exploratory wireframes into **30** designed screens across **13** product sections and **5** primary flows, defined **4** explicit food-safety states, and kept safety-critical checks identical across free and paid tiers. Treated trust and risk communication as interaction architecture, with accessibility set at large targets, Dynamic Type, and reduced motion.
- + **One Master Affordance** *accessibility concept* Accessibility-led CarPlay redesign, designed and coded around a persistent Siri orb that doubles as an AssistiveTouch-style magnifier with targeting and safe abort. A deterministic tremor simulation compared mis-commit behavior under degraded pointer precision and drove the final interaction model, a curb-cut win for every driver.
- + **Wildcard** *published plugin* Claude Code plugin that injects structurally unrelated disciplines into AI-assisted ideation, drawing on pools of **378** disciplines and **461** concepts with automated breadth, safety, and distribution checks. Designed and ran a preregistered blind three-arm study, then retested the revised mechanism on fresh problems: novelty improved by **+0.72** over plain brainstorming, **p=0.037**, ahead on **8 of 10** problems. Published the methodology, reproducible data, tests, and case study as inspectable evidence.
- + **After Tokens** *interaction system* Reusable AI-native system in Next.js and TypeScript exploring diffusion-model text rendering: **4** reveal strategies, responsive word geometry, screen reader support, reduced-motion parity, and automated accessibility checks in CI, treating generated language as a temporal interface state rather than token-by-token streaming.
- + **df2tm** *published plugin, MIT* Always-on learning layer for Claude Code, installable through its plugin marketplace: a persistent local learner model with spaced-repetition scheduling and **4** teaching intensities from silent to Socratic, grounded in a structured library of roughly **170** learning-science principles.

INDUSTRY MENTORSHIP AND REVIEW

Ongoing one-on-one mentorship from a Senior Digital Designer at Marvel Studios. Extended portfolio reviews with a Product Designer at The Walt Disney Company and a Lead Product Designer at Goldman Sachs. All three offered to serve as professional references.

ADDITIONAL EXPERIENCE

Freelance Product, Web, and Visual Designer

Project-Based

Independent client engagements

- + Designed and built a complete professional website and matching resume for a senior digital designer inside a major global entertainment studio, leading content organization, visual direction, information architecture, responsive implementation, and final QA.
- + Reframed a complex multi-role career into one coherent system across resume, site, and portfolio hierarchy, applying product methods to a career artifact: user intent, navigation, hierarchy, progressive disclosure, and accessibility.
- + Positioned the finished work for senior and lead-level creative opportunities, keeping messaging, hierarchy, and visual identity consistent between the site and the resume.

Brand Design and Public Relations

Project-Based

Shawn Klush, internationally touring entertainer

- + Ran visual design, promotional communication, public relations, and audience-facing material for an established legacy brand with an international fan community, holding brand consistency across touchpoints while balancing stakeholder needs and public perception.
- + Built practical experience in audience segmentation, emotional design, stakeholder communication, brand governance, content hierarchy, and experience consistency.

Concept Artist

NDA, Project-Based

Unannounced community expansion for The Elder Scrolls V: Skyrim

- + Developed location concepts for multiple explorable environments, translating narrative, architectural, and worldbuilding requirements into visuals for downstream development inside an established visual ecosystem.
- + Carried reusable product skills out of the work: constraint-based ideation, system consistency, rapid visualization, collaborative handoff, and communicating intent before production.

Actor and Voiceover Artist

2022 to Present

Film, television, and commercial

- + Credits include Daredevil: Born Again (Marvel, Disney+, co-star, episode 9, April 2025), ABC 20/20 (voiceover), and New York Blood Center (commercial lead).
- + Professional practice in reading ambiguous direction, iterating fast under high-frequency critique, collaborating inside multidisciplinary productions, and presenting creative intent to stakeholders.

EDUCATION AND TRAINING

CG Spectrum College of Digital Art and Animation, Diploma in Concept Art. Concept development, visual storytelling, composition, perspective, environment design, color, and production-oriented visual workflows.

Adelphi University, BFA Studio Art coursework, 2020 to 2021. Visual analysis, composition, image-making, and critique.

Lee Strasberg Theatre and Film Institute, professional acting training, 2021 to 2022. Private advanced workshops including Larry Moss, 2025.

Learn Squared, 12 professional courses in visual storytelling, environment design, concept art, and 2D/3D production workflows with Jama Jurabaev, Maciej Kuciara, Greg Rutkowski, Gaëlle Seguillon, Romain Jouandeau, Steve Wang, Louis Laurent, Tyler Smith, Zahir Aghakhani, Daniel Walsh, and Ellie Cooper.

RESEARCH

Independent research and capstone study, 2017 to 2019. Investigated predatory food labeling and adolescent nutritional choices: designed and administered a months-long survey, synthesized the findings into a formal research paper, and submitted the completed work to the Regeneron Science Talent Search.
